## An International Journal

---

### Co-Editors

**G. V. Reklaitis**

*School of Chemical Engineering,  
CHME Building 1283, Purdue  
University, West Lafayette, IN 47907, U.S.A.*

**D. W. T. Rippin**

*Swiss Federal Institute of Technology  
ETH-Zentrum, 8092 Zurich, Switzerland*

---

### Editorial Advisory Board

**G. Buzzi-Ferraris**  
*Milan, Italy*

**I. E. Grossmann**  
*London, England*

**J. W. Ponton**  
*Edinburgh, Scotland*

**M. Shacham**  
*Beer Sheva, Israel*

**B. Carnhan**  
*Ann Arbor, Michigan*

**I. Hashimoto**  
*Kyoto, Japan*

**R. G. H. Prince**  
*Sydney, Australia*

**G. Stephanopoulos**  
*Cambridge, Massachusetts*

**J. Cerda**  
*Santa Fe, Argentina*

**T. Hertzberg**  
*Trondheim, Norway*

**L. C. Puigjaner**  
*Barcelona, Spain*

**W. E. Stewart**  
*Madison, Wisconsin*

**B.-z. Chen**  
*Beijing, China*

**M. Kubiček**  
*Prague, Czech Republic*

**E. M. Rosen**  
*St Louis, Missouri*

**T. Umeda**  
*Tokyo, Japan*

**D. Depeyre**  
*Chatenay-Malabry,  
France*

**M. L. Michelsen**  
*Lyngby, Denmark*

**R. W. H. Sargent**  
*London, England*

**A. W. Westerberg**  
*Pittsburgh, Pennsylvania*

**T. F. Edgar**  
*Austin, Texas*

**M. Morari**  
*Pasadena, California*

**J. D. Seader**  
*Salt Lake City, Utah*

**J. D. Wright**  
*Mississauga, Canada*

**L. B. Evans**  
*Cambridge, Massachusetts*

**R. L. Motard**  
*St Louis, Missouri*

**W. D. Seider**  
*Philadelphia, Pennsylvania*

**D. Edelson**  
*Tallahassee, Florida*  
Liaison Member

### Publishing Office

*(Production Editor: Alison J. Snell)*

Pergamon Press Ltd, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England  
[Tel. Exeter (0392) 51558; Fax 425370]

### Subscription and Advertising Offices

*North America:* Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

*Rest of the World:* Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England  
[Tel. Oxford (0865) 794141; Fax 60285]

### Subscription Rates

Annual institutional subscription rate (1993): £430.00 (US\$688.00). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

### Back Issues

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press offices.

**Published monthly. Copyright © 1993 Pergamon Press Ltd**

Second class postage paid at RAHWAY NJ. Postmaster send address corrections to *Computers & Chemical Engineering*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

## LIST OF CONTENTS

### NUMBER 1

- |                                                                    |                                                                                                                                                  |
|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| H. A. Preisig and D. W. T. Rippin                                  | 1 Theory and application of the modulating function method—I. Review and theory of the method and theory of the spline-type modulating functions |
| H. A. Preisig and D. W. T. Rippin                                  | 17 Theory and application of the modulating function method—II. Algebraic representation of Maletinsky's spline-type modulating functions        |
| H. A. Preisig and D. W. T. Rippin                                  | 29 Theory and application of the modulating function method—III. Application to industrial process, a well-stirred tank reactor                  |
| Y. Ramamurthi, P. B. Sistu and B. W. Bequette                      | 41 Control-relevant dynamic data reconciliation and parameter estimation                                                                         |
| K. Watanabe, H. Koyama, H. Tanoguchi, T. Ohma and D. M. Himmelblau | 61 Location of pinholes in a pipeline                                                                                                            |
| S. Tan, R. S. H. Mah and I. A. Karimi                              | 71 An interactive approach to the design of noncontinuous plants                                                                                 |
| L. G. Bullard and L. T. Biegler                                    | 95 Iterated linear programming strategies for non-smooth simulation: a penalty based method for vapor-liquid equilibrium applications            |
| V. G. Dovi, A. P. Reverberi and L. Maga                            | 111 Optimal design of sequential experiments for error-in-variables models                                                                       |
| P. Englezos and N. Kalogerakis                                     | 117 Constrained least squares estimation of binary interaction parameters in equations of state                                                  |

### NUMBER 2

- |                                                                     |                                                                                                    |
|---------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
| J. K. Bailey, A. N. Hrymak, S. S. Treiber and R. B. Hawkins         | 123 Nonlinear optimization of a hydrocracker fractionation plant                                   |
| S. N. Kavuri and V. Venkatasubramanian                              | 139 Representing bounded fault classes using neural networks with ellipsoidal activation functions |
| P. Grosdidier, A. Mason, A. Aitolahti, P. Heinonen and V. Vanhamäki | 165 FCC unit reactor-regenerator control                                                           |
| Y. L. Huang and L. T. Fan                                           | 181 A fuzzy-logic-based approach to building efficient fuzzy rule-based expert systems             |

S. Mohindra and P. A. Clark	193	A distributed fault diagnosis method based on digraph models: steady-state analysis
E. Kondili, C. C. Pantelides and R. W. H. Sargent	211	A general algorithm for short-term scheduling of batch operations—I. MILP formulation
N. Shah, C. C. Pantelides and R. W. H. Sargent	229	A general algorithm for short-term scheduling of batch operations—II. Computational issues

### NUMBER 3

## INDUSTRIAL CHALLENGE PROBLEMS IN PROCESS CONTROL

### Foreword

D. A. Mellichamp	v	Industrial challenge problems in process control
J. J. Downs and E. F. Vogel	245	A plant-wide industrial process control problem
R. W. Chylla and D. Randall Haase	257	Temperature control of semibatch polymerization reactors
F. Kayihan	265	Adaptive control of stochastic batch lumber kilns
R. C. McFarlane, R. C. Reineman, J. F. Bartee and C. Georgakis	275	Dynamic simulator for a Model IV fluid catalytic cracking unit
G. W. Barton, C. Gannavarapu and J. D. Perkins	301	Optimizing control of a refinery gas-tail

### NUMBER 4

S. K. Mahuli, R. R. Rhinehart and J. B. Riggs	309	pH control using a statistical technique for continuous on-line model adaptation
S. E. Zitney and M. A. Stadtherr	319	Frontal algorithms for equation-based chemical process flowsheeting on vector and parallel computers
D. A. Straub and I. E. Grossmann	339	Design optimization of stochastic flexibility
G. V. Varma, K. H. Lau and D. L. Ulrichson	355	A new tearing algorithm for process flowsheeting
P. B. Sistu, R. S. Gopinath and B. W. Bequette	361	Computational issues in nonlinear predictive control
J. S. Logsdon and L. T. Biegler	367	A relaxed reduced space SQP strategy for dynamic optimization problems

<b>R. Luus</b>	373	Application of dynamic programming to differential-algebraic process systems
<b>Z. Hu, B. Chen and X. He</b>	379	Heuristic synthesis for multicomponent products with simple and sharp separators
<b>A. Lefkopoulos and M. A. Stadtherr</b>	399	Index analysis of unsteady-state chemical process systems—I. An algorithm for problem formulation
<b>A. Lefkopoulos and M. A. Stadtherr</b>	415	Index analysis of unsteady-state chemical process systems—II. Strategies for determining the overall flowsheet index

## NUMBER 5/6

**SELECTED PAPERS FROM THE  
EUROPEAN SYMPOSIUM ON COMPUTER  
AIDED PROCESS ENGINEERING—1 (ESCAPE-1)**

*Guest Editorial***R. Gani**

v

<b>M. L. Michelsen</b>	431	Phase equilibrium calculations. What is easy and what is difficult?
<b>A. Kilakos and B. Kalitventzeff</b>	441	A new implementation for analytical derivatives of thermodynamic properties and its beneficial application on dynamic simulation
<b>C. Schmid and L. T. Biegler</b>	451	Acceleration of reduced Hessian methods for large-scale nonlinear programming
<b>J. Perregaard</b>	465	Model simplification and reduction for simulation and optimization of chemical processes
<b>L. G. Koster, E. Gazi and W. D. Seider</b>	485	Finite elements for near-singular systems: application to bacterial chemotaxis
<b>M. J. Hounslow and E. J. W. Wynn</b>	505	Short-cut models for particulate processes
<b>P. Bilardello, X. Joulia, J. M. Le Lann, H. Delmas and B. Koehret</b>	517	A general strategy for parameter estimation in differential-algebraic systems
<b>B. Landwehr, G. Wozny and H. Hartmann</b>	527	Simulation of coupled columns with three phases
<b>M. Rovaglio, T. Faravelli, G. Biardi, P. Gaffuri and S. Soccol</b>	535	The key role of entrainer inventory for operation and control of heterogeneous azeotropic distillation towers
<b>V. R. Dhole and B. Linnhoff</b>	549	Distillation column targets

<b>P. Djavdan</b>	561	Design of an on-line scheduling strategy for a combined batch/continuous plant using simulation
<b>R. Maciel Filho and C. McGreavy</b>	569	The influence of configuration on controller design of multitubular reactors
<b>L. Naess, A. Mjåavatten and J.-O. Li</b>	585	Using dynamic process simulation from conception to normal operation of process plants
<b>M. Türkay, T. Gürkan and C. Özgen</b>	601	Synthesis of regulatory control structures for a styrene plant
<b>M. T. Vester, R. J. P. Van der Linden and J. L. A. Pangels</b>	609	Control design for an industrial distillation column
<b>S. Fararooy, J. D. Perkins, T. I. Malik, M. J. Oglesby and S. Williams</b>	617	Process Controllability Toolbox (PCTB)
<b>L. Regan, I. D. L. Bogle and P. Dunnill</b>	627	Simulation and optimization of metabolic pathways

## NUMBER 7

<b>V. K. Jayaraman</b>	639	An algorithm for solving bidisperse catalyst pellet problems
<b>D. I. Kamenski and S. D. Dimitrov</b>	643	Parameter estimation in differential equations by application of rational functions
<b>B. Tasheva and A. Anastasov</b>	653	Successive approximations method for the analysis of gas-liquid reactions in a bubble column
<b>S. Krishnan, G. W. Barton and J. D. Perkins</b>	663	Robust parameter estimation in on-line optimization—Part 2. Application to an industrial process
<b>J. F. Pekny, D. L. Miller and G. K. Kudva</b>	671	An exact algorithm for resource constrained sequencing with application to production scheduling under an aggregate deadline
<b>A. R. Secchi, M. Morari and E. C. Biscaia Jr</b>	683	The waveform relaxation method in the concurrent dynamic process simulation
<b>K. G. Mahmoud</b>	705	Heat transfer with a moving boundary—application to transient solidification of a warm liquid on a moving cold plate
<b>P. K. Paranjape and A. P. Kudchadker</b>	717	A knowledge intensive methodology for thermodynamic choices
<b>N. Hvala, S. Strmčnik and J. Černetič</b>	739	Scheduling of batch digesters according to different control targets and servicing limitations

## NUMBER 8

- G. V. Reklaitis iii Announcement—Best Paper of 1991
- R. W. DiRaddo and A. Garcia-Rejon 751 Profile optimization for the prediction of initial parison dimensions from final blow moulded part specifications
- S. N. Kavuri and V. Venkatasubramanian 765 Using fuzzy clustering with ellipsoidal units in neural networks for robust fault classification
- E. G. Cochlovius and K. Schnitzlein 785 The system editor and simulator SES: applying a digital simulator in chemical engineering education
- A. Onana and A. Mbala Hikolo 799 SOR method for multistaged separation columns computations
- M. Meyer, B. Koehret and M. Enjalbert 807 Data reconciliation on multicomponent network process
- R. D. De Veaux, D. C. Psychogios and L. H. Ungar 819 A comparison of two nonparametric estimation schemes: MARS and neural networks
- J. A. M. Kuipers, K. J. van Duin, F. P. H. van Beckum and W. P. M. van Swaaij 839 Computer simulation of the hydrodynamics of a two-dimensional gas-fluidized bed

## NUMBER 9

- M.-Y. Wey 859 Dynamic simulation of a high-temperature slagging incineration process
- U. M. Diwekar and B. Morel 873 Space nuclear power plants—I
- E. Eckert and M. Kubiček 879 Multiple liquid-vapour equilibrium flash calculation by a global approach
- Y. Flitris and P. Hatzikonstantinou 885 Numerical treatment of the heat transfer from wall to fluidized bed using the particle model
- S. J. Wang and S. W. Yu 897 Robust feedback design for nonlinear high-purity distillation column control
- R. Raman and I. E. Grossmann 909 Symbolic integration of logic in mixed-integer linear programming techniques for process synthesis
- F. Friedler, K. Tarjan, Y. W. Huang and L. T. Fan 929 Graph-theoretic approach to process synthesis: polynomial algorithm for maximal structure generation
- Short Notes*
- M. Hoza and M. A. Stadtherr 943 An improved watchdog line search for successive quadratic programming
- J. Viswanathan and I. E. Grossmann 949 An alternate MINLP model for finding the number of trays required for a specified separation objective

## NUMBER 10

- B. K. Srinivas and M. M. El-Halwagi** 957 Optimal design of pervaporation systems for waste reduction
- J. B. McLaughlin** 971 Convergence of a relaxed Newton's method for cubic equations
- M. H. Kaspar and W. H. Ray** 985 Partial least squares modelling as successive singular value decompositions
- J. W. Ponton and J. Klemeš** 991 Alternatives to neural networks for inferential measurement
- W. R. Becraft and P. L. Lee** 1001 An integrated neural network/expert system approach for fault diagnosis
- V. L. Perov, B. V. Paliukh and V. G. Kuperman** 1015 Defective chemical process chain detection in uncertainty condition
- G. P. Whitnell, V. J. Davidson, R. B. Brown and G. L. Hayward** 1025 Fuzzy predictor for fermentation time in a commercial brewery
- L. B. Jansen and A. B. Corripio** 1031 A computer control algorithm for feedback composition control using off-line analysis
- D. Semino, C. Scali and A. Brambilla** 1041 Design of double filter IMC controller for ill-conditioned distillation columns

*Short Notes*

- J. W. Ponton** 1047 The use of multivariable rational functions for non-linear data representation and classification
- G. Buzzi-Ferraris and E. Tronconi** 1053 An improved convergence criterion in the solution of nonlinear algebraic equations

## NUMBER 11

- A. Spence, D. J. Worth, S. T. Kolaczowski and P. I. Crumpton** 1057 Modelling catalytic combustion in a monolith reactor: a numerical algorithm for varying solid phase Péclet numbers
- F.-X. Renard, L. Sterling and C. Brosilow** 1067 Knowledge verification in expert systems combining declarative and procedural representations
- J. R. Nunhez, M. Mori and S. G. d'Ávila** 1091 Fitting thermodynamic data using the modified spline technique
- O. Iordache, J. P. Corriou, L. Garrido-Sanchez, C. Fonteix and D. Tondeur** 1101 Neural network frames. Application to biochemical kinetic diagnosis
- S. Narasimhan and P. Harikumar** 1115 A method to incorporate bounds in data reconciliation and gross error detection—I. The bounded data reconciliation problem

- |                                                                                            |                  |                                                                                                                                                                                                                                           |
